• **WHO SHOULD ATTEND**

• **Energy and Water Law**

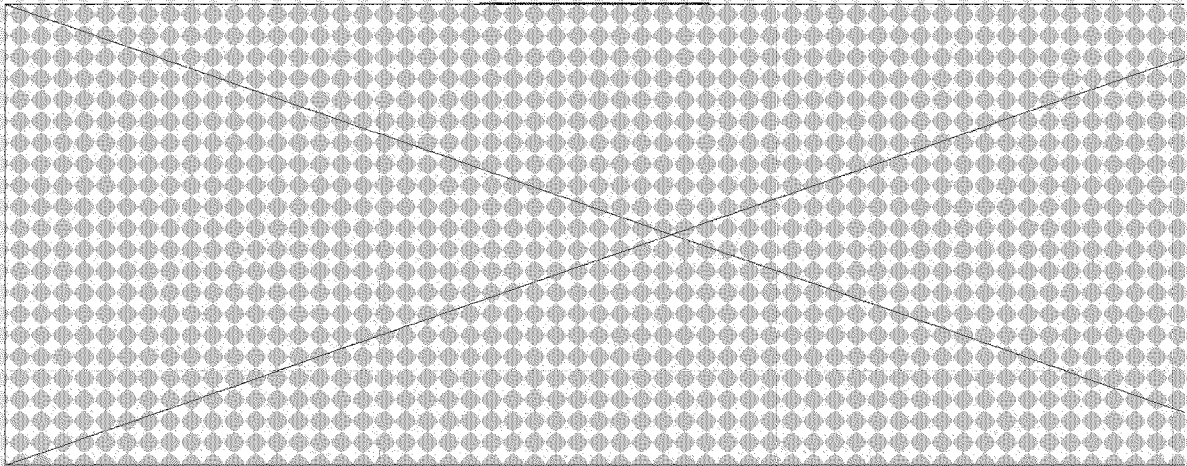

- Practitioners
- Energy Industry Professionals
- Engineers
- Environmental Professionals
- Federal, State and City Government Officials
- Landowners
- Water Brokers
- Anyone Who Needs to Know About Water, Oil and Gas!

This program is the first of a 3-part series focusing on critical water, oil and gas issues in Colorado. We have gathered top legal, water, and energy experts who will share their extensive experience and expertise with you. You will leave the program series with a solid foundation on technical aspects, legal frameworks, and potential regulations and controls involved when natural resources of vital importance to Colorado – water, oil and gas – cross paths.

The first program will provide you with an overview of the pertinent law and issues generated when the water, oil and gas industries interact; and will address water quality concerns and the sourcing of water from municipalities and beyond for hydraulic fracturing and drilling. The second program will focus on oil and gas water recycling and whether it should be mandated along with the legal implications of water reuse. The third program will explore the ins and outs of landowner/oil and gas company negotiations with a focus on water interests.

Don't miss this opportunity to get up to speed on high profile issues of utmost importance in Colorado.
